

Call Script:

I am reaching out today on behalf of all teachers and students within the state, as well as my own community of Manhattan Beach. We must prioritize the education of our youth and restore the proposed cuts to education so schools can safely open in the fall. Please approve the budget put forward by the California Legislature and distribute any available funding evenly. ALL school districts need the resources to focus on learning loss and safety for their school communities so that students can get back to learning. Cuts that occur later this summer and into the fall will not only put districts into insolvency, but will jeopardize the quality of all public schools. As the Governor, you have the ability to protect our public schools.
